Galaxy Specialties, Inc.  
(A Development Stage Company)  
Notes to the Financial Statements  
March 31, 2003

**GENERAL**

Galaxy Specialties, Inc. (the Company) has elected to omit substantially all footnotes to the financial statements for the nine months ended March 31, 2003 since there have been no material changes (other than indicated in other footnotes) to the information previously reported by the Company in their Annual Report filed on the Form 10-KSB for the twelve months ended June 30,

2002.

## UNAUDITED INFORMATION

The information furnished herein was taken from the books and records of the Company without audit. However, such information reflects all adjustments which are, in the opinion of management, necessary to properly reflect the results of the interim period presented. The information presented is not necessarily indicative of the results from operations expected for the full fiscal year.

In this report references to "Galaxy Specialties," "we," "us," and "our" refer to Galaxy Specialties, Inc.

## FORWARD LOOKING STATEMENTS

This Form 10-QSB contains certain forward-looking statements and for this purpose any statements contained in this Form 10-QSB that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, words such as "may," "will," "expect," "believe," "anticipate," "estimate" or "continue" or comparable terminology are intended to identify forward-looking statements. These statements by their nature involve substantial risks and uncertainties, and actual results may differ materially depending on a variety of factors, many of which are not within our control. These factors include, but are not limited to, economic conditions generally, failure by management to successfully develop business relationships, and competition within the merger and acquisitions market.

## ITEM 2: PLAN OF OPERATION

We are a development stage company with no assets and recurring losses from inception and we are dependent upon financing to continue operations. For the three and nine month periods ended March 31, 2003 and the year ended June 30, 2002, we had no cash on hand and total current liabilities of \$28,000. The \$28,000 note payable is related to accounting and legal fees incurred during the 2000 fiscal year which were paid on our behalf by a related party.

We have no material commitments for the next twelve months. We believe that our current cash needs for at least the next twelve months can be met by loans from our directors, officers and shareholders, based on understandings we have with these persons. However, these understandings are not formal agreements and therefore these persons are not obligated to provide funds. We may repay any loans, costs of services and advancements with cash, if available, or we may convert them into common stock. In the event we acquire a business opportunity, then it may be necessary to raise additional capital, which may be accomplished by selling our common stock.

Our management intends to actively pursue business opportunities during the next twelve months. Based on current economic and regulatory conditions, management believes that it is possible, if not probable, for a company like ours, without many assets or liabilities, to negotiate a merger or acquisition with a viable private company. The opportunity arises principally because of the high legal and accounting fees and the length of time associated with the registration process of "going public." However, should any of these conditions change, it is very possible that there would be little or no economic value for anyone taking over control of Galaxy Specialties.

We have not made a formal study of the economic potential of any business and as of the date of this filing, we have not identified any assets or business opportunities for acquisition. Potential investors must recognize that because of our limited capital available for investigation and management's limited experience in business analysis we may not discover or adequately evaluate adverse facts about the business opportunity to be acquired. All risks inherent in new and inexperienced enterprises are inherent in our business. Also, we intend to concentrate our acquisition efforts on properties or businesses that we believe to be undervalued or that we believe may realize a substantial benefit from being publicly owned. Investors should expect that any acquisition candidate may have little or no

operating history, or a history of losses or low profitability.

It is emphasized that our management may effect transactions having a potentially adverse impact upon our shareholders pursuant to the authority and discretion of our management to complete acquisitions without submitting any proposal to the stockholders for their consideration.

Should a merger or acquisition prove unsuccessful, it is possible that we may decide not to pursue further acquisition activities and management may abandon its activities and our shares would become worthless.

### ITEM 3: CONTROLS AND PROCEDURES

We rely on controls and procedures to ensure that material information regarding our company and its operations is provided to the public in a timely manner. On May 6, 2003, our Principal Executive and Financial Officer evaluated the effectiveness of these disclosure controls and procedures and determined that there were no significant deficiencies in these procedures.

The officer did not identify any deficiencies or material weaknesses in our internal controls, nor did she identify fraud that involved our management who had a significant role in our internal controls. Also, she did not find any deficiencies or weaknesses which would require changes to be made or corrective actions to be taken related to our internal controls.
